Term	Definition
calculated field	A new field created from existing data, using custom calculations
data pivoting	A data analysis technique that rearranges rows into columns, usually aggregating multiple values into a single cell
histogram	A data visualization format that uses bars to represent the number of items found in every range
responsive design	A visual design approach that assures proper content rendering on different screen sizes
scatter plot	A type of chart used for visualizing the correlation between two variables
treemap	A data visualization format that displays hierarchical data and quantities, using nested rectangles
Unified Resource Locator (URL)	A reference or hyperlink to a web resource
